**Location:** Vilnius, Lithuania  
**Job Function:** Service and Maintenance  
**Employment Contract Type:** Regular/Permanent, Full-Time  
**Division/Function:** Discrete Automation and Motion  
**Business unit:** Business Unit Drives and Controls  
**Publication ID:** EE58339004_I2

### Tasks
In the Field Service Engineer position you will be performing individually or in a team the planning, monitoring, documentation, technical support, and other activities during on-site or off-site repair of systems or products.

Your works tasks include:
- Diagnosing technical problems, determining corrective actions, and repairing of products and/or systems via remote or on-site service
- Giving technical advice and/or training to the customers when needed and offering them new technical solutions when applicable
- Developing an ability to perform basic level drives service sales tasks and implementing the skills in everyday work
- Ordering spare parts when needed and reporting works done in required systems

In all operations you must make sure to ensure safe work environment at all times.

### Requirements
- Higher technical degree and / or work experience
- Good communication skills
- Computer literacy
- English, Lithuanian and Russian language skills in a good level
- Driving licence

### ABB offers:
- Opportunities for continuous self-improvement
- Remarkable experience and challenging tasks
- Possibility to collaborate with colleagues from other countries

ABB (www.abb.com) is a leading global technology company in power and automation that enables utility, industry, and transport & infrastructure customers to improve their performance while lowering environmental impact. The ABB Group of companies operates in roughly 100 countries and employs about 135,000 people.

ABB has been operating in Lithuania since 1992. Main activities in Lithuania include transmission network and distribution substation projects, medium and low-voltage products, automatics projects and robots, maintenance services for industrial customers.

ABB drives and renewables factory is dedicated to the manufacturing of drives, inverters and power converters. It provides a comprehensive range of products to fit the various customer needs, particularly in discrete automation applications, as well as in wind and solar applications.
