SUCCESS STORIES

Railway

New South - Australia

New South Wales
Australia Train

The purpose of the project was the design, validation, and testing of air conditioning units, air production units, auxiliary power distribution, diesel power unit, and train software development.

Aerospace

Madrid - Spain

Development of updates and maintenance of servers owned by INTA, which host databases containing images collected by satellites, ensuring the availability of these images to end clients such as the Spanish Government for civilian applications, or to the Army and NATO for military missions as required.

Big Data & Analytics

Brasil - Brasil

Architecture of a Big Data Platform. The main objective was to develop a reference platform for the transmission of information and knowledge about logistics and transportation, both public and private, in Brazil.
